GREEN TIP

Cleaning for appearance only is a perfectly acceptable standard for spaces including offices and retailers. By interspersing water-only and detergent cleaning procedures, you can reduce overall maintenance expenses and go green as you limit or eliminate use of harmful chemicals. A facility might require a deeper scrubbing weekly or monthly instead of daily, alternating with water-only cleanings to effectively clean visible grime — giving floors an overall polished look, while washing away any residual detergent and preventing unwanted buildup.

GREEN TIP

Some of the most beautiful and low-maintenance landscaping these days is also what is known as "xeriscaping," or landscaping that does not require supplemental watering. As fresh-water resources are becoming scarcer and more expensive worldwide, you will see more commercial buildings moving toward using drought-tolerant plants and groundcovers. Not only does xeriscaping lower water bills, it requires less maintenance and little or no lawn mowing. Although it requires a bit more startup work than laying sod, the benefits endure for years.

Mesh bag minimizes tangling and protects mop heads during laundering.

A. EchoMop Looped End Wet Mop Heads

The first mop head made from recycled PET plastic bottles, contributing to reduced landfill waste, energy consumption and impact on greenhouse gases. EarthSpun® fibers are manufactured from 30% post consumer P.E.T. plastic bottles. Product contains 30% post consumer and 97% total recovered material. Longer lasting, lower linting mop head offers 20% better performance than competitive all synthetic wet mop yarns. Absorbs more than 4.4 times its weight in water and releases almost 30% upon wringing. Washable and fast drying. Dries quickly 90% dry after only the spin cycle of the washer; air dries 100% overnight. Wide 5 in. mesh headband works with clamp, quick change or jaws mate handles (sold separately). 12 mop heads per case. ☑

B. Enviro Clean Looped Mop Heads

Patented, mildew resistant DuPont® material is designed to meet cleanroom (Class 1000) applications for lint reduction. Ideal for cleanup of foodservice areas, hospitals and oil and hazardous chemical spills. Cotton/synthetic blend fibers are interlocked for strength, less linting and launderability. Fibertac process cut end mops last three times longer than comparable cut end mops. Durable double sewn tailband. Narrow 1¼ in. canvas tape headband works with clamp style mop handles (sold separately). 12 mop heads per case.

C. Patriot Mops

Made from a unique yarn blend whose source gives them their distinctive color. Derived from the manufacture of military uniforms, this 100% recycled yarn is a blend of cotton and synthetic fibers. The presence of Kevlar® in the recycled material provides added toughness and abrasion resistance. Headband and tailband are made of virgin material. Product contains 97% total recovered material. Yarn is highly absorbent and durable enough for heavy duty cleaning. Tailband helps reduce streaking, snagging and loose strings. Launderable and reusable. Good for heavy cleaning. Reduces labor. Made in the USA. 12 mop heads per case. ☑

Bamboo: A Rapidly Renewable Resource

Raw materials that renew quickly can assist with creating a sustainable future. Bamboo can be harvested in five to seven years, whereas trees can require 10 to 50 years before harvesting. Bamboo is sturdy enough to be made into flooring and other products traditionally reserved for wood, such as cutting boards, kitchen accessories, and more. As it functions comparably to wood but renews up to 10 times faster, bamboo is a viable material alternative for a sustainable future.

J. Kleen-Pail®

Kleen Pails® meet HACCP dedicated use guidelines for cleaner and sanitizer cloths used to wipe down surface areas. Kleen Pails® make it easy to separate containers used for food storage from those used for dangerous non food purposes. They also eliminate any potential confusion between cleaning and sanitizing solution containers. Kleen Pails® are used for sanitizing solutions and have a 6 qt. capacity. 12 pails per case.

Product Type

Benefit Feature

Cut-end wet mop heads

Mop heads with cut ends are available in designs that fasten to, screw-in, clamp or grip handles. They're available in cotton, synthetic blend and all-synthetic fibers, with value-priced and premium yarns. *(Find these on page 208)*

Looped end mop heads

Mop heads with looped ends offer multiple benefits, as the looped design reduces tangling, avoids unraveling and fraying, and lessens linting. The addition of a tailband helps prevent even more tangles. A tailband also provides more floor coverage with each stroke and less streaking, for faster mopping and reduced labor. *(Find these on pages 209-211)*

Cotton

An economical choice, a cotton mop head often requires the tradeoff of some break-in time. Cotton absorbs well. Consider cotton absolutely suitable for general cleaning purposes. *(Find these on pages 208-212)*

Synthetic/synthetic blends

Pure rayon offers immediate absorbency and quick release, making it a smart choice for finishing floors, disinfecting and application of chemicals. Blended fibers can deliver up to five times the absorbency of 100% cotton and lend well to general cleaning, disinfecting and application of chemicals. Synthetic and synthetic blend mop heads withstand repeated laundering with minimal or no shrinkage, and are better suited to heavy cleaning when compared to cotton. *(Find these on pages 208, 211-212)*

Microfiber

The leading edge of mop head fibers, microfiber cleans more effectively than cotton and offers far greater durability through multiple launderings versus synthetic blends. By using microfiber, you can reduce and often eliminate cleaning chemicals. Microfiber lends itself to tube designs, and tube mop heads reduce drag, easing labor. Lightweight yet highly absorbent, microfiber mop heads can help lower the risk of injury. *(Find these on pages 211, 213, 226-227)*

Sponge

Sponge mops include lever functionality for easy wringing of the soaked mop head. *(Find these on page 212)*

GREEN TIP

Think about greener solutions, not perfect solutions. It is human nature to feel overwhelmed by the challenges of taking care of something as big as the "environment." But we aren't going to solve the problems by becoming perfect overnight. We will do it one step at a time. Once you have a commitment to do your part you will find that there are lots of opportunities to make small differences. Some will be very easy decisions, like choosing the greener alternative or picking a vendor who offers green options. You can make a difference right now, one choice at a time.
